

# SECO REGRINDING SERVICE

## MAKE RECONDITIONING EASY

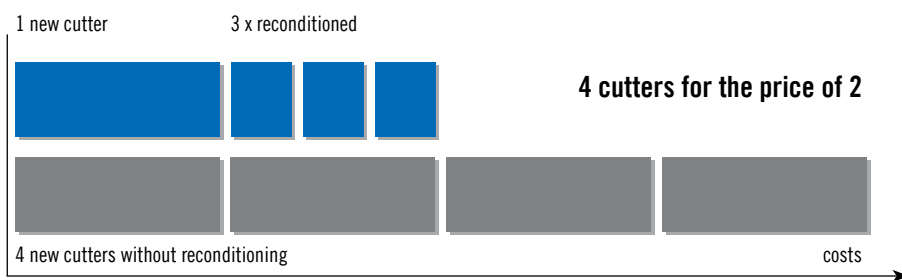

Our solid tool reconditioning program offers more than just tool grinding. It also gives you "new" tools at a reduced cost.

Seco's solid carbide drills are reground to original geometry, with the same CNC grinding program and coating. Special tools are reshaped after drawing.

- Guaranteed high performance, just like a new tool
- Original Seco geometry, preparation and coating
- Significant savings on costs by reusing solid carbide tools
- Easy identification with delivery note and shipping box
- From used to "new" through a very simple process
- Guaranteed quality; all processes are ISO9001 and ISO14001 certified

## IMPORTANT COST SAVINGS

The price for grinding and recoating a tool is about 1/3 of the price for a new tool, and a tool can be, on average, reground three times. In addition, you can use Seco recycling programs and save even more money.

## CONTACT US

For any questions, please contact your local Seco representative or contact Seco Tools UK Customer Services Team:

T: +44(0)1789 764220

E: [uk.sales@secotools.com](mailto:uk.sales@secotools.com)

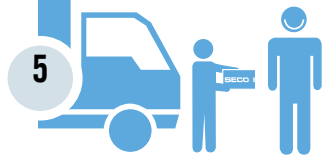

## THE SIMPLE PROCESS

- 

1 Complete the form attached or alternatively contact Seco Tools (UK) Customer Services Team
- 

2 Pack the tools in their original packaging and arrange delivery to Seco Tools (UK) Ltd.
- 

3 The tools are reground and coated to the original geometry. Each tool is laser marked for traceability.
- 

4 The reground tools are inspected and repackaged.
- 

5 Seco will return your "new" tools within 3 weeks.
